

# Woodward Avenue

- Full reconstruction of sanitary systems to address failed sewer main, and ensure reliable service for the next 50 years.
- Full reconstruction of the water distribution system ensuring reliable water service for residents for the next 50 years.
- Full reconstruction of storm water services for ensuring proper drainage and preserving the lifespan of the newly installed infrastructure and residents' properties and improving accessibility through the use of mountable curbs.
- Full reconstruction of the roadway and road surface. The roadway was narrowed to address historical speeding concerns from residents, improving safety for both motorists and pedestrians.
- Narrowing of the roadway provided residents with longer driveways.
- Sightlines at intersections were adjusted to improve traffic safety for larger vehicles.
- Historical property line issues were rectified to ensure property that residents believed they owned was transferred under their ownership.
- Properties previously zoned for commercial use were re-zoned as residential to allow for the development of additional housing.
